SUMMARY

- Strategic technical leader with a strong foundation in front-end engineering and cross-functional team leadership. Proven success in scaling AI-driven operations, owning enterprise delivery pipelines, and aligning product, engineering, and research teams in high-growth environments. Passionate about driving clarity, operational excellence, and innovation in ambiguous, fast-paced settings.

LEADERSHIP EXPERIENCE

- **G2I** Aug 2025 – contracting
AI Operations Lead
 - **Human Data Pipeline Pilot:** Designed and executed an internal human data pipeline pilot that produced actionable operational insights, validating feasibility and directly supporting early client acquisition for simulated-environment AI research.
 - **Zero-to-One Startup Execution:** Built core AI operations from inception through scale, standing up foundational systems and processes to support rapid growth from 0 to 200 contributors.
 - **AI Operations Enablement:** Owned operational execution after client acquisition, setting up the infrastructure, workflows, and tooling required for teams building simulated software environments used in reinforcement learning research.
 - **Identity & Access Management:** Architected secure identity and access infrastructure using Okta, implementing SSO, SAML, and SCIM-based provisioning to enforce one-click onboarding and offboarding across all services.
 - **Enterprise Tooling & Automations:** Researched, selected, deployed, and integrated enterprise SaaS tooling including Slack, Google Workspace, Linear, Cursor, OnePassword, and time-tracking platforms, tying systems together through internal automations to reduce manual ops overhead.
 - **Operational Scaling:** Managed day-to-day AI operations spanning account provisioning, access controls, service reliability, vendor negotiations, and enterprise subscription upgrades in a fast-moving research environment.
 - **Cross-Functional Partnership:** Partnered with IT, engineering, and research stakeholders to align AI operations with security, compliance, and human data delivery requirements.
- **Mercor** Nov 2024 – April 2025
Operations Manager Remote
 - **Largest AI Training Project:** Spearheaded sourcing & onboarding of 600+ domain experts in <7 days, enabling client to launch their next-gen AI model on schedule—accelerating time-to-market.
 - **Revenue-Driving Execution:** Co-led AI training programs that directly supported \$80M+ in ARR, managing delivery pipelines and execution strategy across multiple high-complexity domains.
 - **Strategic Vendor & Stakeholder Leadership:** Shaped vendor selection strategy alongside C-suite and represented the company in evaluations with a trillion-dollar partner—delivering polished technical demos, coaching subject-matter experts, and fielding live Q&A. Secured a \$40 M ARR engagement, increasing deal confidence and accelerating closing velocity.
 - **Operational Excellence:** Designed human-in-the-loop QA pipelines that increased dataset accuracy from 90% to 98%, expediting model fine-tuning and reducing retraining cycles by two weeks.
 - **Exceptional Impact:** Achieved 100% NPS—driving repeat engagement and earning client acknowledgment for exceptional operational leadership and expert satisfaction.
- **Mercor** Aug 2024 – Oct 2024
QA Engineer - Contract Leland, NC
 - **High-Volume QA Sprints:** Executed 40+ rubric-based LLM evaluation tasks per week (100–200 total), performing A/B response comparisons and content quality checks under strict week-long sprint SLAs.
 - **Edge-Case Discovery:** Identified and documented critical model failure patterns and edge cases, crafting detailed feedback reports that informed the client's next AI training iteration.
 - **Cross-Functional Handoff:** Partnered with the project manager to escalate issues and deliver polished QA deliverables on schedule, ensuring seamless integration into the client's AI data pipeline.
- **Thatcher Technology Group** Mar 2023 – Dec 2023
Front End Lead - Contract Remote / Illinois, United States

- **Project Ownership:** Led the complete front-end lifecycle for a Fortune 500 client, delivering accessible, responsive desktop and mobile web applications.
- **Accessibility:** Implemented ADA-compliant code to ensure accessibility for visually impaired users, aligning deliverables with modern standards.
- **UI Modernization:** Redesigned legacy webpages into engaging, modern interfaces that improved usability and increased user engagement.
- **Cross-Functional Collaboration:** Worked closely with UX designers and backend engineers to ensure seamless functionality and an intuitive user experience.

Developer PRO

Aug 2021 – Mar 2023

React Developer

Leland, NC

- **Modernization:** Led the migration of legacy React codebases to containerized architectures using Docker, improving scalability and deployment efficiency.
- **Mentorship:** Mentored junior developers and refined code review processes via GitHub to maintain high-quality, maintainable code.
- **Next.js Applications:** Developed data-driven applications using Next.js and Chart.js, boosting user engagement through interactive visualizations.
- **Design Implementation:** Transformed complex design specs into scalable, accessible web apps that met WCAG standards and performed consistently across browsers.

Apple Inc.

Nov 2020 – Jul 2021

Technical Specialist & RCC Advisor

Remote / Greensboro, NC

- **Customer Advocacy:** Provided remote support in Retail At Home, resolving technical issues and elevating customer satisfaction by turning detractors into promoters.
- **Technical Enablement:** Simplified complex Apple ecosystem concepts to empower users and increase product confidence and engagement.
- **Relationship Repair:** Applied strong communication and problem-solving skills to rebuild strained customer relationships.

Apple Inc.

Nov 2019 – Nov 2020

Specialist

Greensboro, NC

- **Customer Engagement:** Guided customers in identifying their needs and passions to recommend the right Apple products, deepening brand connection.
- **Sales Performance:** Consistently exceeded performance targets through adaptability, creativity, and consultative selling.
- **Innovation:** Created workflow efficiencies using Apple Shortcuts, which improved team-wide customer experience strategies.
- **Team Collaboration:** Shared tools and insights across the team to foster a culture of innovation and continuous improvement.

LEADERSHIP & STRATEGY

- Owned full-cycle technical delivery for AI and enterprise web solutions in high-growth environments.
- Led technical demos and stakeholder alignment for a Fortune 500 partner engagement.
- Mentored engineers, standardized QA pipelines, and implemented accessibility and scalability best practices.
- Thrived in ambiguity, translating technical complexity into actionable strategy for non-technical stakeholders.
